

ImmunoE

WORK IN PROGRESS SESSIONS

Mar 11, 2026 | 3PM-4PM

Lidia Piatnitca, Ph.D. Student

Wisnovsky Lab, Faculty of Pharmaceutical Sciences, UBC

“CRISPR activation screens map the genomic landscape of cancer glycome remodeling”

Input on: Sialic acid, glycans, Siglec, CRISPR screening, cancer immune evasion, glycome remodelling

Grace Kuo, Ph.D. Student

McNaghy Lab, School of Biomedical Engineering, UBC

“Pluripotent stem cell-derived Type 2 innate lymphoid cells exhibit potent antitumor activity against pancreatic cancer cells”

Input on: Innate lymphoid cells (ILCs), Cell therapy, Cancer
