

ImmunoE

WORK IN PROGRESS SESSIONS

May 13, 2026 | 3PM-4PM

Megha Srinivas, Ph.D. Student

Kaigala Lab, Laboratory of Microtechnologies for Quantitative Biomedicine,
SBME, UBC

“Engineering methods to study spatial tumor-immune cell interactions temporally through biopatterning”

Input on: Biopatterning, tumor microenvironment, chemotherapy, immunotherapy

Wanda Janaeska, Ph.D. student

Blakney Lab, School of Biomedical Engineering and Michael Smith
Laboratories, UBC

“Investigating the spatiotemporal kinetics of self-amplifying RNA (saRNA) delivered via lipid nanoparticles”

Input on: Experimental set-up and question gaps
